New material from Professor Nicolaides and Dr. Bujold

Latest information on aspirin meta analysis and early screening for pre-eclampsia.

Following his recent "Pyramid of Pregnancy Care" presentation Professor Nicolaides moves on to 1st trimester pre-eclampsia screening. He will discuss his latest prospective study results.

Dr Bujold will review the literature on why aspirin treatment should start before the 16th week of pregnancy. He will discuss the optimum dose of aspirin and when to start and finish the treatment of high risk patients.

Who

To maternal fetal medicine specialists, obstetricians, laboratory personnel, and ultrasonographers interested in leading edge research in Maternal Health and in the latest developments in pre-eclampsia prediction.
